## CORE COMPETENCIES

Providence offers a full range of environmental and engineering consulting services to address air, surface water, groundwater, solid and hazardous waste, cultural resources, natural resources, National Environmental Policy Act compliance, and site evaluation/remediation regulatory matters.

Providence also uses UAS technology to enhance its expertise in all aspects of engineering, regulatory analyses, permitting, modeling, monitoring, and compliance.

## PAST PERFORMANCE

Our engineers and environmental professionals have successfully solved complex engineering and environmental challenges since inception and owe our success to our stellar client relations, timely performance, strong project management, and commitment to producing quality deliverables. Our personnel have worked with numerous local, state, and federal government entities and we further serve a client base that includes many multinationals in a wide range of industries.

**Providing permitting and regulatory compliance for more than 2,000 clients over our 24-year history.**

## POTENTIAL PARTNERSHIP

We also have personnel with required federal certifications, supplemental licensures, and professional development trainings to ensure a margin of excellence for federal projects and partnerships.
